The addition of whole numbers is the process to find the sum of two or more whole numbers. It can involve an increase or a reduction in value, depending on whether the whole numbers are positive or negative or a mixture. The addition of whole numbers is an arithmetic operation performed with numbers having the same sign with different signs to find the sum. More tax on the addition of integral numbers in this article. Rules for the addition of whole numbers there are some rules to follow to add two or more whole numbers. The whole numbers are complete numbers that have no fractional parts, includes positive, zero and interior numbers, negative numbers. The rules for the addition of entire numbers are reported below: the sum of an integer and its inverse additive is 0. The addition of two positive entire numbers always translates into a positive value that is greater than both The whole numbers. The addition of two negative entire numbers always translates into a more small negative number of the numbers indicated. The addition of a positive number with a negative number is performed finding the difference between the absolute value of both numbers. Therefore, the sign with the largest number is attached to the sum. The addition of whole numbers with 0 is in the same number. The rules for the addition of entire numbers can be included with the help of the table indicated below. By adding whole numbers with the same sign when we add two whole numbers with the same sign, we add their absolute values and attack the common sign with the sum. For example, 2 + 3 = 5, (-2) + (-3) = -(2 + 3) = -5. The absolute value of a number is the positive value of the number given. For example, the absolute value of 6 is 6, the absolute value of -6 is 6 and so on. Below are some examples of integral numbers added with the same sign: (-1) + (-9) = -(1 + 9) = -10 3 + 8 = 11 (-2) + (-17) = -(2 odnearttos odnearttos atiguese eneiv isrevid inges noc iretni iremun eud onognuigga ehc isrevid inges noc iretni iremun id atnuigga'L .etsopsir etseuq eracifrev rep iretni iremun ignuiggA enInO htameuC id erotaloclac li asU 91- =)71 id atnuigga'llus 'Aip id eripac rep oipmese nu omaidnerP .ovitagen o ovitisop ais oremun li ehc adnoces a artsed a o artsinis a ais itlas odnecaf etnedecerp esaf allen otautis oremun la regetni odnoces li eregnuigga id olleuq 'À elanif ossap II :4 ossaP .itlas 91 erednerp iop e 2 erazzilacol ehc otsotuiup ,artsed osrev itlas 2 erednerp iop e amirp aenil allus 91 omaivort es oilgem 'À ,91 e 2 eregnuigga id ongosib omaibba es ,oipmese reP .eroiggam otulossa erolav nu noc oremun nu etnemlibireferp ,aciremun aenil allus iretni ilged isaislauq onu eraudividni id olleuq 'À ovisseccus ossap II :3 ossaP .1 ad eritrap a oilgetnec id iremun id alacs anu erednerp omaissop /7 e 2- eregnuigga omaibbod eS /2 ossaP .oroval ortson li eratilacaf rep oremun aenil allus 01 id alacs anu erednerp omaissop ,03- e 01 eregnuigga omaibbod es ,oipmese dA .itad iretni ilgad ednepid aiv ~Assoc e ,05 01 /5 1 id ilpitlum ni iremun eracicart omailgov es ,oipmese dA .aciremun aenil allus alacs anu ereilgecs id olleuq 'À ossap omirp II :1 ossaP .oremun aenil anu us iretni eregnuigga emoc omairapni .arO .oremun aenil allus isrevoum a omaizini evod ad esab id otnup emoc oserp 'À otad sregetni isaislauQ .aciremun aenil alled jovitagen otal li o/ ortsinis otal li osrev isodnatstops atautteffe eneiv ovitagen oretni nu id atnuigga'L .aciremun aenil alled jovitisop otal li o/ ortsed otal li osrev isodnatstops atautteffe 'À ovitisop oremun nu id atnuigga'L .itacidni ipicnirp ius asab is oremun id aenil anu us iretni id atnuigga'L iremun id aenil anu us sregetnl eregnuigga 1 = 3 + 2 .otnatreP .ovitisop Àras etnatlusir oremun led onges li ,ovitisop onges nu ah 3 e ,2 > 3 laD 1 = 2 - 3 'À ehc itulossa irolav itseuq art aznereffid al eravort ,arO /3 'À 3 id e ,2 'À 2- id otulossa erolav II .ibmartne id itulossa irolav i omaivort amirp ,3 e 2- eregnuigga omailgov es ,oipmese dA .otulossa erolav roiggam li noc oremun led onges li eragella idniug e ,itulossa irolav on a line of numbers.
