CHAPTER 1

SETTING UP

Unpacking and Inspection

Your QuadraVerb 2 was packed carefully at the factory, and the shipping carton was designed to protect the unit during shipping. Please retain this container in the highly unlikely event that you need to return the QuadraVerb 2 for servicing.

The shipping carton should contain the following items:

- This instruction manual
- Alesis QuadraVerb 2 with the same serial number as shown on shipping carton
- AC Power Supply Adapter
- Alesis warranty card

J It is important to register your purchase. If you have not already filled out your warranty card and mailed it back to Alesis, please take the time to do so now.

AC Power Hookup

The QuadraVerb 2 comes with a power adapter suitable for the voltage of the country it is shipped to (either 110 or 220V, 50 or 60 Hz).

With the QuadraVerb 2 off, plug the small end of the power adapter cord into QuadraVerb 2's [POWER] socket and the male (plug) end into a source of AC power. It's good practice to not turn the QuadraVerb 2 on until all other cables are hooked up.

J Alesis cannot be responsible for problems caused by using the QuadraVerb 2 or any associated equipment with improper AC wiring.

Line Conditioners and Protectors

Although the QuadraVerb 2 is designed to tolerate typical voltage variations, in today's world the voltage coming from the AC line may contain spikes or transients that can possibly stress your gear and, over time, cause a failure. There are three main ways to protect against this, listed in ascending order of cost and complexity:

- Line spike/surge protectors. Relatively inexpensive, these are designed to protect against strong surges and spikes, acting somewhat like fuses in that they need to be replaced if they've been hit by an extremely strong spike.
- Line filters. These generally combine spike/surge protection with filters that remove some line noise (dinner buzz, transients from other appliances, etc.).
- Uninterruptible power supply (UPS). This is the most sophisticated option. A UPS provides power even if the AC power line fails completely. Intended for computer applications, a UPS allows you to complete an orderly shutdown of a computer system in the event of a power outage, and the isolation it provides from the power line eliminates all forms of interference—spikes, noise, etc.

Audio Connections

The connections between the QuadraVerb 2 and your studio are your music's lifeline, so use only high quality cables. These should be low-capacitance shielded cables with a stranded (not solid) internal conductor and a low-resistance shield. Although

The construction blocks for any music producer, Alesis V49, is a powerful and intuitive MIDI controller that allows you to take command of your music software with a series of pads, knobs and buttons. With 49 sensitive keys to Fullocity speed and octave buttons on/already, you can expand the keyboard to the complete melodic range and play bass lines, agreements and melodies. V49 also has four knobs and buttons that are assigned for manipulating plugins of effect and virtual tools: open and closed filters, regulates volume levels, activates effects, modification parameters and more. Eight back-round bearings sensitive to speed allow you to launch clips or drums with an exceptional response and the pitch and modulation wheels expand the expressive ability of your performance. The plug-and-go software V49 has been designed to integrate seamlessly and effortlessly with your music software. A single USB connection to your Mac or PC provides both functionality of power and MIDI, which allows you to connect to the computer and start making music. All knobs, buttons and bearings light up to provide visual feedback in real time and are arranged for an intuitive workflow. In addition, the V49 Slim design simplifies the implementation of this powerful MIDI controller in any study study. Ableton Live & Xpand! 2 V49 is in Bundle with Ableton Live Lite 9 and Xpand! 2 of Air Music Tech, two dynamic software that allow you to record, produce and perform with your computer. Ableton Live Lite 9 is a fluid audio/midi environment that allows you to record, remix, improvise and spontaneously modify musical ideas on the fly. Xpand! 2 is an advanced virtual tool that is provided with a collection of premium sounds, ranging from acoustic tools to futuristic synthesizers. Together, these powerful Music allows you to create or perform music with V49 right away. Find a trader of alesis now.
